

Ruchika Rajodiya | Full-Stack Developer

+1(312)-284-7145 | Ruchikarajodiya25@gmail.com | [Ruchika-portfolio](#) | [GitHub](#) | [LinkedIn](#) | OH | USA

PROFESSIONAL SUMMARY

Full-Stack Developer experienced in building scalable web applications using ASP.NET Core, C#, React, and SQL Server. Skilled in developing RESTful APIs and CRUD modules, implementing JWT-based authentication, and creating responsive user interfaces. Strong understanding of backend architecture, database optimization, and Agile development. Uses AI tools to support debugging, documentation, refactoring, and test creation while maintaining clean, reliable code

EDUCATION

Illinois Institute of Technology	January 2024 - December 2025
Computer Science (Master)	
Gujarat Technological University	June 2019 - May 2023
Computer Engineering (Bachelor)	

EXPERIENCE

Software Engineer (ASP.NET / Windows Environment) Destiny Solution Pvt. Ltd.	May 2020 - November 2023 Ahmedabad, India
- Pioneered and delivered end-to-end backend and full-stack features using C# and ASP.NET MVC, contributing to 15+ production-ready modules supporting core business operations. - Designed and maintained RESTful APIs serving 5,000+ monthly users, improving data validation, security, and reducing system errors by 30%. - Created and integrated React-based UI components with backend services, improving user engagement and reducing page load time by 25%. - Optimized SQL Server databases, queries, and stored procedures, reducing average query response time by 35% and improving application scalability. - Refactored legacy code into modular, reusable components, decreasing maintenance effort by 40% and accelerating new feature development cycles. - Resolved critical production issues by strengthening logging, input validation, and exception handling, reducing system downtime by 20%. - Collaborated in Agile/Scrum teams to deliver 95% of sprint commitments on schedule, ensuring timely deployment of user-facing features.	

PROJECTS

Online Management System
- Developed an ASP.NET MVC web application from scratch with secure authentication and role-based authorization (Admin/User). - Built 6+ modules with CRUD operations, server-side validation, and proper MVC separation. - Composed responsive dashboards for both Admin and User roles. - Implemented email notifications for confirmations and status updates. - Optimized SQL Server queries to support search, filtering, and reporting features.
ServiceHub Pro (Multi-Tenant Business Operations Platform)
- Developed a multi-tenant platform using ASP.NET Core Web API and Clean Architecture, supporting 100+ users and 10+ client organizations. - Implemented JWT-based authentication with role-based access control, reducing unauthorized access by 40%. - Built modular APIs for customers, appointments, work orders, and invoicing, automating 60% of core business workflows. - Applied layered architecture (Domain, Application, Infrastructure, API) to improve maintainability and reduce defect rates by 25%. - Introduced Integrated SQL Server with Entity Framework Core, improving query performance and reducing errors.
Logistics Resource Optimization Platform
- Prepared backend services and data models to manage operational workflows. - Generated RESTful endpoints with validation and structured error handling. - Produced data workflows supporting optimization-driven decision making. - Focused on API reliability and maintainable architecture design.

SKILLS

Languages: C#, JavaScript, TypeScript, Python, SQL, Java
Backend: ASP.NET Core, REST APIs, Authentication (JWT), Node.js
Frontend: React, JavaScript, TypeScript, Angular, HTML, CSS
Databases: SQL Server, PostgreSQL, MongoDB
Tools: Git/GitHub, VS Code, Visual Studio, Postman, JIRA
Testing/Practices: Unit Testing (pytest), Debugging, SDLC, Agile/Scrum
Platforms: WordPress (Themes/Plugins, REST API, Membership/Forms)
CS Fundamentals: Data Structures & Algorithms, Networking (HTTP/TCP basics), OS fundamentals, Concurrency basics
